PROFILE

10+ years experience in Software Engineering, developing products in the EdTech, Digital Automotive, and FinTech industries with an innate ability to quickly adapt to emerging technologies. I am studying MBA to improve my business skills, where I specialise in Innovation Management, Digital Business, and Project Management. I am considering transitioning into Product Management to leverage my technical expertise and business acumen.

EDUCATION

MBA - General Management

University of Nottingham Business School

Activities and societies:

- MBA Alumni Ambassador 2022
- Dissertation (Currently working): **Quensus Limited** - Digital Marketing strategy for an entrepreneurial tech firm.
- Pay review and proposed roadmap for implementation for all Staff (Phase 1) for the **University of Warwick**; presented to Senior Management of Deloitte
- Worked in a team of 8 to aid a local charity - **Northampton Hope Centre** in developing a Marketing and Revenue Generation Plan;
- Collaborated as a team to introduce a tech-based solution '**Revive**' to India's agricultural sector to reduce food waste; presented a business pitch to reuse 'food produces' to a new B2B value co-creation.
